

NUVO™

NEXT GENERATION CRACK SEALANTS

NUVO hot-pour pavement crack and joint sealants are formulated with superior performance and customer satisfaction in mind. With features like PolySkin™ packaging, inteliBond™ technology, superior crack penetration, quick setup times, wide application temperature ranges, and fast melt times, NUVO sets a new standard for crack sealants. Instead of stopping at minimum specifications, NUVO focuses on greater performance, longevity, and long-term value.

GOOD CHEMISTRY

InteliBond technology is the result of more than 40 years of advanced polymer chemistry. Sealants formulated with inteliBond flow smoother, bond better, stretch farther, set up quicker, and resist tracking better. InteliBond is a simple way to describe some very complicated science.

QUALITY FIRST

Quality-First™ means that Maxwell Products will never compromise the quality of our products just to beat a competitor's price. We believe true value requires a delicate balance between quality and cost, and achieving that balance will always be at the forefront of our efforts.

MELTABLE DONE RIGHT

We did it first, and we did it best. PolySkin is the industry's only structural, stable, quick-melt packaging solution. PolySkin pallets wont slump or sag, and the expanded polymer beads float until fully dissolved to eliminate the mess and clogs common with "plastic bag" solutions.

KEEPING IT 100

Actual photo of Tensile Adhesion Testing

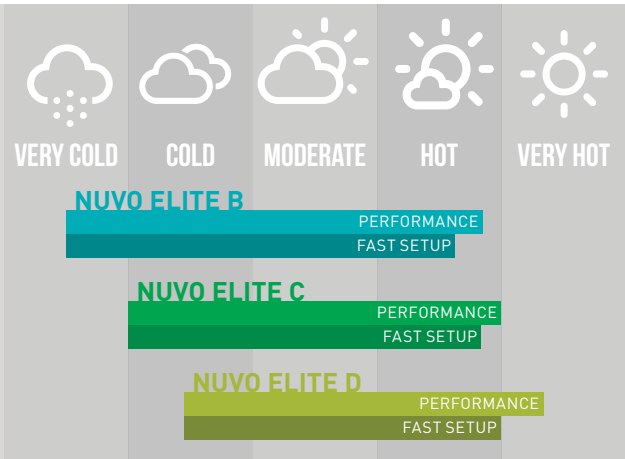

Maxwell Products tests 100% of the material we produce. While many manufacturers perform skip-lot testing (only testing periodic batches) or only test when specifically required by contract, we invest in our customers' satisfaction by testing every batch of material we make. If it doesn't meet the promised specifications, it never leaves our facility.

Our products and packaging are **fully compatible** with melters produced by third-party equipment manufacturers, including **Crafco, Cimline, Bearcat, Marathon, SealMaster**, and more.*

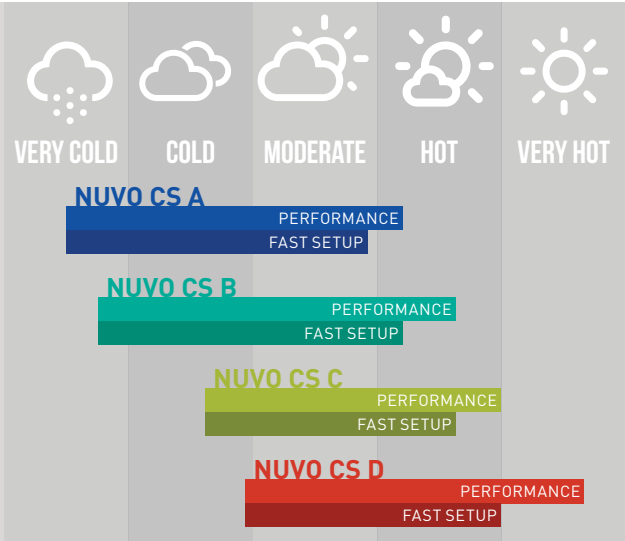

NUVO™ ELITE

Made from the finest raw materials, NUVO Elite sealants belong in a class of their own. With extended performance ranges, faster setup times, and direct-fire compatibility, the Elite line offers the greatest range of benefits and versatility available from any hot-pour crack sealant.

NUVO™ CS

An excellent, all-purpose sealant, NUVO CS delivers an even balance between cost and performance. These premium sealants are formulated with a medium viscosity and smooth consistency for greater ease of application.
